

competition exhibition – „music“

www.fumetto.ch

Fumetto announced an extremely broad subject for this year's competition. Music is an age old form of communication and omnipresent in our lives. Each and every one of us connects special emotions to it or revisits a particular part of their lives with specific melodies, beautiful and sad, funny and horrible. And just who doesn't remember that first concert or album...a huge field for inspiration, passion and experiences of all kinds.

Music and comics belong no doubt to the most important exponents of pop culture and continue to move on together, quite obviously in the music video area. Fumetto does not want to portray music only in the sense of Popular Culture, but to point out the similarities at hand between the two, remembering that we've been communicating with pictures almost as long as with music.

Fumetto is proud to announce yet another record number of entries in this their anniversary year. The universal theme "Music" stimulated the creativeness of the participants and reached an incredible sum of 1024 entries from a record 33 countries.

The 2006 Jury includes:

Mirjam Broger, Culture manager- Paris / Yves Demay, Journalist- Lausanne / Katja Lühge, Journalist- Berlin / Helge Reumann, Illustrator- Geneva / Stefano Ricci, Drawer- Hamburg

Fumetto holds a competition each year. The aim is to give comic-creators the opportunity to compare their work and to present it to a broader public. All entries will be exhibited at Fumetto 2006 in the festival centre. Each and every comic will be judged by the five jury members and the winners will be announced at the festival.
